

## Avert's sex quiz

### Easy questions

#### 1. Oral sex is...

- a. When you talk during sex
- b. Using your mouth to stimulate your partner's genitals
- c. Another word for French kissing

*Answer: b. Oral sex involves oral stimulation (i.e. sucking or licking) of the penis or the vagina.*

#### 2. What is foreplay?

- a. Forward planning before going on a date
- b. Kissing, cuddling and sexual activities before sexual intercourse
- c. Flirting between two people who know they are attracted to one another

*Answer: b. Sexual intercourse begins with foreplay. Both partners get sexually excited through kissing and cuddling, touching and sexual activities.*

#### 3. When having sex, the best way to avoid an STD is to...

- a. Use a condom
- b. Have sex standing up
- c. Only have anal sex

*Answer: a. Condoms are the most effective way to prevent STD infection. STDs can be passed on through anal sex, and sex while standing up will not give any protection against STDs.*

#### 4. How do you have sexual intercourse?

- a. A man and a woman put their mouths together and massage their tongues
- b. A man puts his penis inside a woman's vagina and moves it backward and forward
- c. A man or a woman touches their partner's genitals

*Answer: b. Sexual intercourse is when the man's penis goes inside the woman's vagina and moves backward and forward, creating a pleasurable sensation for both partners. Sexual intercourse might also be used to describe sex acts between two men or between two*

women.

**5. Bisexual people...**

- a. Can be attracted to women or men
- b. Are not attracted to either women or men
- c. Have had a sex change

*Answer: a. Bisexual people have sexual feelings towards both women and men.*

**6. You "lose your virginity" when...**

- a. You sleep in the same bed as another person
- b. You have sexual intercourse for the first time
- c. You get married

*Answer: b. The term 'to lose your virginity' means to have sex for the first time.*

**7. Unprotected sex is...**

- a. When a man puts his penis into a woman's vagina in an unsafe location
- b. When a man puts his penis into a woman's vagina without her consent
- c. When a man puts his penis into a woman's vagina without using a condom

*Answer: c. Having unprotected sex means having sex (when a man puts his penis into a woman's vagina) without using a condom.*

**Medium questions**

**1. Does having sex hurt?**

- a. Only if you get it wrong
- b. Sometimes
- c. Only if you have a sexually transmitted disease

*Answer: b. First time sex may be uncomfortable for the woman, but after the first time, sex should become more comfortable. A woman may also experience pain when having sex if her vagina does not produce enough natural lubrication.*

**2. Herpes can be transmitted by...**

- a. Oral sex only
- b. Vaginal sex only
- c. Both oral and vaginal sex
- d. Neither oral nor vaginal sex

*Answer: c. Genital herpes is passed on through skin contact with an infected person. The virus affects the areas where it enters the body, through kissing, penetrative or oral sex. The best way to prevent STD infection is to use a condom.*

**3. The age of sexual consent is the age at which you can...**

- a. Agree to go on a date
- b. Have sex
- c. Get married

*Answer: b. The age of consent is the age when the law says you can agree to have sex. This might differ depending which country you are in. In most countries, until you reach this age you can't legally have sex with anyone, however old they are.*

**4. What is an orgasm?**

- a. Intense sexual feelings towards a person
- b. A climax that happens during vaginal sex only
- c. A climax that can happen during vaginal, anal or oral sex, and masturbation

*Answer: c. An orgasm is a pleasurable climax that can happen during all types of sex and masturbation.*

**5. Will both partners definitely have an orgasm during heterosexual sex?**

- a. Yes, definitely
- b. No, not always
- c. Only the woman

*Answer: b. Both partners do not always have an orgasm during sex. Sometimes it can take a while depending on the sexual position and how aroused both partners feel.*

**6. When is a "safe" time for a girl to have unprotected sex so that she will not become pregnant?**

- a. On the first day of her period
- b. There is no "safe" time of the month
- c. Just after her period is finished

*Answer: b. There is unfortunately no 'safe' time to have unprotected sex if you wish to avoid getting pregnant. Even unprotected sex during a girl's period can result in pregnancy.*

### **7. What is the 'missionary' position?**

- a. The body position where the man lies on top of the woman during sex
- b. The body position where the woman sits on top of the man during sex
- c. The body position where the woman and man lie side by side during sex

*Answer: a. A common sexual position is for the woman and man to be lying down, face to face with either the woman or man on their back. If the man is lying on top this is often referred to as the missionary position.*

## **Hard questions**

### **1. Monogamy is when you...**

- a. Only have one sexual partner
- b. Decide not to have sex with anyone
- c. Have sex with many different people

*Answer: a. Being monogamous means being faithful to one partner.*

### **2. What are lubricants?**

- a. A type of contraception
- b. A type of female condom
- c. A type of male condom
- d. A product designed to make sex smoother

*Answer: d. Lubricant, or 'lube' is like a cream or jelly which can be used to make sex go a little more smoothly. It should be put on the outside of a condom so that the penis slides into the vagina more easily. Only water-based lubricant should be used with a condom as oil-based ones could cause it to degrade.*

**3. Which is the most common STD transmitted through oral sex?**

- a. Hepatitis C
- b. HIV
- c. Chlamydia
- d. Herpes

*Answer: d. The most common STD transmitted through oral sex is herpes. Herpes can cause cold sores around the mouth or genital herpes sores.*

**4. Sexual transmission of HIV (male-to-male and heterosexual) accounts for roughly what proportion of all AIDS diagnoses in the United States?**

- a. One-third
- b. Half
- c. Two-thirds

*Answer: c. Male-to-male sexual contact is the predominant HIV transmission route in the U.S., accounting for almost half of all AIDS diagnoses in the U.S. The sharing of infected needles, and heterosexual contact, account for the second and third highest numbers of total AIDS diagnoses.*

**5. What is the average global age for having sex for the first time?**

- a. 16
- b. 19
- c. 25

*Answer: b. Surveys have shown that the average global age for first having sex is around 19, and in some countries it's as high as 23.*

**6. The 'withdrawal method', or withdrawing the boy's penis before he 'comes' during sex, is...**

- a. A good way to prevent pregnancy
- b. A good way to prevent STD infection
- c. Not a good way to prevent pregnancy or STDs

*Answer: c. If a boy pulls his penis out before he ejaculates, the girl can still become pregnant. Sperm can be present in pre-cum and just a small amount in or around the*

*vagina can be enough to make a woman pregnant.*

**7. 'Cunnilingus' is another word for...**

- a. Oral sex performed on a woman
- b. Homosexual anal sex
- c. Foreplay

*Answer: a. The word cunnilingus derives from the Latin for 'vulva' (cunnus) and 'to lick' (lingere).*
